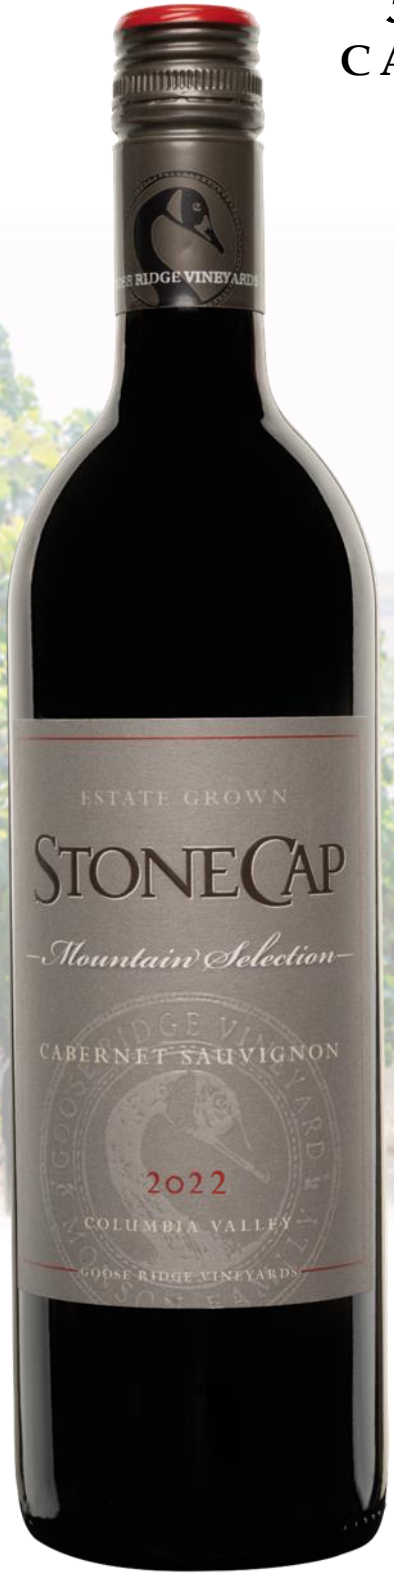
STONECAP

Mountain Selection

CABERNET SAUVIGNON

Estate Grown

Columbia Valley



WINEMAKING

The fruit for this wine was carefully sourced from some of our favorite Cabernet Sauvignon blocks of the estate. The warm vintage allowed for long hang time in the vineyard and tremendous flavor development in the grapes without over-ripening and loss of varietal character. During fermentation, the wine was pumped over twice daily until a balance of color, structure, and flavor extraction had been achieved. Malolactic fermentation was completed on oak, smoothing and softening the wine. The final blend was created as an authentic expression of the Estate's Cabernet Sauvignon and the depth that can be found in Washington wines

TASTING NOTES

Enticing aromas of wild raspberry and pomegranate mingle with hints of dark chocolate, clove, and thyme. The palate is smooth and velvety, offering supple red berry flavors balanced by a polished structure and subtle earthy minerality. A bright, refined acidity enhances the wine's plush texture, leading to a graceful, lingering finish.
